Sandeep Kiran

Bengaluru, India | US Citizen | Indian OCI

kiransandeep9@gmail.com +91 97317 28819 linkedin.com/in/sandeeepkiran github.com/SandeeepKiran

Summary

QA Manager with **5+ years** in conversational AI, leading a team of **8** for test strategy, release sign-off and team development. Builds AI-driven QA systems (LLM tester agents, LLM-as-judge evaluation) that cut manual testing by **90%**

Experience

SoundHound AI **Bengaluru, India**

Formerly Amelia.ai, an IPsoft company

QA Manager *Jul 2025 – Present*

- Lead a team of **8** QA engineers (grown from **3**, scaling to **10**): assign and delegate work, run 1:1s, and give performance feedback to the Director of QA
- Own test strategy and QA project planning, give go/no-go release sign-off for the Amelia conversational AI platform across enterprise clients, and present quality status and release reports to clients and leadership
- Built **Project Anemo**, an AI regression platform where LLM tester personas converse with Amelia and are scored per goal, plus LLM-as-judge FAQ testing that cut scenario authoring from hours to **minutes**
- Mentored and onboarded new QA engineers, and authored the team QA Handbook that standardized test design, bug reporting and release checks
- Drove AI adoption in QA with reusable Claude Code skills, MCP integrations and prompt libraries for Claude, ChatGPT, Gemini and Cursor

QA Lead *Jul 2023 – Jul 2025*

- Built **10** internal QA web tools, including a bug finder, reporting assistant and test case generator, used team-wide
- Automated release and regression testing across **45+** client projects, cutting manual testing time by **70%**
- Cut defective releases by **40%** in 3 months with smoke and regression gates before every deployment

QA Engineer *Jun 2021 – Jul 2023*

- Tested NLU intents, dialogue flows and APIs for banking, insurance and healthcare clients at a **90%+** quality rate
- Built Excel VBA and Python KPI dashboards that automated test reporting for clients and leadership
- Wrote prompt and intent test sets for NLU and NLG models, catching intent architecture issues early

Skills

AI and LLMs: Claude Code, Claude API, ChatGPT, Codex, Gemini, Cursor, MCP, prompt engineering, LLM evaluation, agentic workflows

AI Evaluation: DeepEval, LLM-as-judge, RAG, hallucination and groundedness, synthetic test data, agents and chatbots, AI safety, prompt injection

Testing: Test strategy, regression, smoke, functional, UAT, API, NLU and intent, voice AI (ASR, TTS), pytest, Playwright, Postman

Tech and tools: Python, TypeScript, Kotlin, VBA, Next.js, REST, Git, GitLab, CI/CD, Jira, Confluence, Excel, KPI and KRA reporting

Domains: Banking, insurance, healthcare, ITSD, e-commerce, telecom, EdTech, retail, travel

Education

Vidya Vardhaka College of Engineering **2016 – 2020**

Mysuru, India

Bachelor of Engineering in Computer Science

Projects, community and research continue on **page 2** →

Projects (GitHub)

Project Anemo | *Next.js, TypeScript, Claude API* **2025**
- AI regression platform where LLM tester personas hold full conversations with a bot and are scored against each goal, replacing manual scenario runs with repeatable batches of **50**

Kitsune Labs | *TypeScript, Python, LLM APIs* **2026**
- Nine browser-based QA tools for chatbots and voice bots (bug finder, test case and utterance generators, transcript converters, QA reports), rebuilt publicly with sample data and your own AI key
- github.com/SandeeepKiran/kitsune-labs

My Random Gallery | *Kotlin, Jetpack Compose, Android* **2026**
- Built a native Android photo and video gallery (Material 3, Media3, Coil) with seven tabs and a full-screen viewer
- Profiled and fixed a UI freeze at **5,000–10,000** images by moving state work off the main thread and replacing an $O(n^2)$ shuffle with seeded sampling
- github.com/SandeeepKiran/Windfall-Random-Gallery

Leyline Autofill | *JavaScript, Firefox / Chrome / Edge extension, OpenAI and Claude APIs* **2026**
- One-click AI autofill for job application forms on any site; the user reviews every answer and presses Submit
- github.com/SandeeepKiran/Leyline-Autofill

Amazon – My Personal UX | *JavaScript, Chrome MV3* **2026**
- Shipped a Chrome extension (v3.7) with **24** toggle-able features that restructure Amazon pages for faster shopping
- github.com/SandeeepKiran/My-Personal-UX-for-Amazon

Sandstorm | *Python, Android Management API* **2026**
- Android device-management (MDM) service that puts ordinary phones into a locked-down state: forced VPN, app allow-list, USB lock and remote wipe, using Google's official API

JHora Modern | *Python, Windows 11, Accessibility* **2026**
- Rebuilding a legacy Vedic astrology desktop app as an accessible Windows app for low-vision users, validated against an **8,024**-test regression suite for exact numeric parity

SoundHound Internal QA Tools | *JavaScript, HTML, LLM APIs, Excel* **2023 – 2025**
- **Python Analytics Dashboard:** Python and Tkinter dashboard that automated test-result and KPI reporting
- **Test Case Generator:** generates test cases in bulk from conversation transcripts in Excel, via an LLM API
- **QA Bug Finder:** LLM conversation analysis that flags defects, with a parallel multi-key mode for second opinions
- **Intent Validation File Creator:** generates intent test utterances with Gemini, for one intent or in bulk from Excel
- **Transcript to .replay File:** converts transcripts into Amelia replay test files, one at a time or in bulk
- **Transcript to Txt File:** formats transcripts into Amelia test files, one at a time or as a bulk zip
- **Sub-string Finder:** formats transcripts and extracts the first user utterance for intent checks
- **CM Extractor:** extracts custom metrics from transcript exports in Excel
- **QA Reporting Assistant:** report generator and email templates for daily QA reporting
- **QA Template Toolkit:** status, requirement, critical-issue and meeting emails, plus AI-drafted custom templates
- **Interactive QA Handbook:** the team QA handbook and dashboard: QA mission, lifecycle and project health

Community and Research

Research Publication | *Natural Language Processing* **2019**
- **Publication:** A Comparative Study on Parsing in Natural Language Processing, *IEEE Xplore*
- https://ieeexplore.ieee.org/document/8819687

XDA Developers, Senior Contributor | *Android custom ROMs, Android 9–14* **2019 – 2023**
- Found and reported **400+** bugs through feedback analysis, and helped **20+** developers run their ROM communities, growing user engagement **10%** month over month
- Supported **10,000+** members with self-written documentation, including a beginners guide to custom ROMs for the Redmi K20 Pro
- Managed community projects end to end: QA testing of ROM builds, build and release pipelines from test builds to public release, bug intake and triage, and member support

Yodayo AI, Model Tester | *LLMs: Nephra 8B, Horus 34B, WizardLM-2* **2024 – 2025**
- Tested and gave structured feedback on community LLM releases
- Evaluated AI image, video and text generation, testing LLM behaviour and prompting techniques across releases

Atelier801, Level Designer | *Game level design* **2014 – 2016**
- Designed and published game levels for the Atelier801 player community
- Moderated the community and created forum content as part of an internship
